Clerk of the Board:

The most recent LO CSD public update was 12/2020.

The most recent LO CSD Board of Directors agenda has them still reviewing site alternatives, most of the options for which we knew before the CSD was formed. It also has them reviewing a Project Roadmap Document, again 3 years later!

They have outsourced basic functions to MNS Engineering to the tune of \$8,000 to \$10,000 per month and three years later we still have no public recommendations for WWTP options.

Enough, it is clear the Los Olivos CSD does not have the capacity to undertake their primary function. Please do not recommend yet another extension so that we can bring the capacity of the County of Santa Barbara to bear on this issue.

Thank you.
