SANTA BARBARA LAFCO COMMISSION  
105 E. Anapamu Street  
Santa Barbara, CA 93101

**RE: May 5, 2016 Changes of Organization Agenda Item: Annexation Of W. Santa Ynez Parcels Into Santa Ynez Community Services District**

Dear LAFCO Commissioners:

Heal the Ocean appeared before LAFCO during its meeting of March 3, 2016, when the Commission was considering as informational only, LAFCO File 16-02: West Santa Ynez Annexation to the Santa Ynez Community Services District.

We presented each Commissioner a notebook with maps and documents, so there hopefully is no need to repeat that information today, but a quick recap is that Heal the Ocean has been working on the septic system/groundwater problems of Santa Ynez since 2001, and we very much want to see the Commission today approve the Annexation of W. Santa Ynez into the Santa Ynez Community Services District.

The principle reason this approval needs to happen as soon as possible is that the area in question is now under the law of the Santa Barbara County Local Agency Management Plan (LAMP), which regulates septic systems in areas labeled "problematic" for septic system use. The LAMP went into effect January 1, 2016. West Santa Ynez is considered problematic for septic system use.

The LAMP requires a homeowner experiencing a septic system failure to install an advanced system at a cost of approximately \$40,000 and engage in a monitoring program in which reports are filed at a minimum of once per year to Santa Barbara County Environmental Health Services (EHS). This is a punitive situation that is more readily remediated by public sewer service, such as SYCSD is offering the homeowners in the area, at less than half this cost and with a financing plan.

The W. Santa Ynez area which consists of approximately 380 homes on septic systems in an area of poor soils and rising nitrates in groundwater. EHS does not want to see this continue, neither does Heal the Ocean - and the LAMP now requires something to be done.

The Santa Ynez Valley Community Plan (October 6, 2009) discusses the septic system problems in the area, and describes on p. 118 "*Public sewerage represents the probable best long-term wastewater management approach for Janin Acres and West Santa Ynez*".

Santa Barbara County Environmental Health Services (EHS) has provided \$150,000 for a sewer engineering study for the W. Santa Ynez area, which is already underway by Cannon Engineering.

The citizens of Santa Ynez need to be given an alternative that would cost them half of what it would cost if they were required to install an advanced septic system. Your constituents do deserve your help to move along a process wherein they can decide for themselves whether or not to hook up to public sewer.

To determine the level of interest of homeowners in switching to public sewer, Heal the Ocean sent out questionnaires to every household, and the returned questionnaires were highly favorable toward moving forward. Annexation would give them that choice. They still do have a choice, in that when final costs are determined, they can vote Yes or No. (A file of Responses to the HTO questionnaire is attached to this letter).

Heal the Ocean will thank you for your help in removing septic systems from areas where they impact groundwater, and we respectfully request that today you adopt the resolution that will approve LAFCO application 16-02 for the West Santa Ynez Annexation to the Santa Ynez Community Services District..

Thank you!

With very best regards,

A handwritten signature in black ink that reads "Hillary Hauser". The signature is written in a cursive, slightly slanted style.

Hillary Hauser, Executive Director

it all depends on the cost of hooking up to the Sewer system. about 1985 we closed off our leachfield and put in a new dry well. we have had NO problems with our septic system since then.

**RE: SEWER CONNECTION TO SANTA YNEZ COMMUNITY SERVICES DISTRICT**

YES, I am interested in a town-hall meeting with Santa Ynez CSD and/or other officials, to find out about hooking my home or property to sewer (costs/annexation issues, etc.);

NO, I am not interested in meeting to find out about hooking my home to sewer;

YES, I would want to hook into sewer if I could get significant funding help through long term payment/ financing and/or grant funds;

YES, I would want to hook into sewer even if grant funding help is not available, and if our current septic system is determined to have failed the new standards.

COMMENTS? (Thank you!): \_\_\_\_\_

We of course do not wish to contribute to egregious pollution of our groundwater or oceans; however, we also do not want to go to unnecessary expense because of alarmist environmental conclusions

Thanks for working on this.

There wasn't a stamped self-addressed envelope so I sent this to Heal the Ocean.

Gary

P.S. We, all, tried this in 2000, what happened to that effort and will this time be any different?

\_\_\_\_ YES, I would want to hook into sewer if I could get significant funding help through long term payment/ financing and/or grant funds;

\_\_\_\_ YES, I would want to hook into sewer even if grant funding help is not available;

COMMENTS? (Thank you!):

*This subject came up several years ago and I, along with those living in this area turned down the opportunity to hook up to sewer. Not only would the cost be prohibitive, the need for hook up is unnecessary. The existing septic tank and leach field work well. As an experienced building inspector and housing rehabilitation specialist I am familiar with a good and safe maintenance routine, which keeps my relatively young septic tank and field. I know of no law that requires this or any other measure.*

*We do not want any hook-up to a sewer line!*

*Respectfully,  
Dale
