Subject: Protect Prime Farmland in Lompoc

To the Local Agency Formation Commission:

Please deny the City of Lompoc's proposal to convert 148.3 acres of important agricultural land to housing development.

- Approval of this project would threaten unique and important prime farmland and undermine local agricultural production.
- There is sufficient, vacant undeveloped land within the City's current boundaries to accommodate the City's housing needs.
- The City must analyze potential impacts of future development on the 148.3 acres that could ultimately be converted due to this proposal.

Thank you for your consideration.
